Summary Planting Guide - Strawberries

[Home](#) » [Home Gardeners](#) » [Planting Guide](#) » [Strawberries](#)

Spacing

- 12" - 18" between plants unless otherwise noted
- 3' - 4' between rows
- Depth – see our Planting Guide for detailed charts

Irrigation

- Water thoroughly after planting
- 1" - 2" rainfall or equivalent per week, depending on soil

Fertilization

- Mix ½-1lb of 10-10-10 per 100 sq ft into soil before planting
- Add supplementary fertilizer in July and August
- pH: 6.5 - 6.8

Weed Control

- Prepare your site prior to planting
- Control weeds before they start with a granular herbicide
- Proper mulching will aid in weed control

Winter Protection

- Cover plants with straw to protect the crowns
- Apply mulch after several good frosts
- Remove mulch in early spring before new growth
